SUMMARY

Distinguished Computer Scientist with over 14 years of experience in architecting and developing scalable backend systems, leading cross-functional teams, and driving technical innovation. Demonstrated expertise in designing microservices architectures, enhancing system performance, and integrating data science methodologies to improve product offerings. Recognized with multiple awards and patents for engineering excellence.

EXPERIENCE

Distinguished Engineer

Zippia

March 2021 - Present, San Francisco, CA (Remote)

- Shaped technical strategy, leading cloud-native migration on GCP, cutting costs by 28% and improving scalability.
- Designed real-time analytics dashboard, processing millions of data points daily for user behavior insights.
- Mentored a team of 10 engineers, fostering best practices in system design.

Senior Computer Architect

Zippia

March 2018 - February 2021, San Francisco, CA (Remote)

- Led backend and data science integration, enhancing job recommendation accuracy by 40%.
- Developed a personalized job search algorithm for 7 million+ listings for efficient querying.
- Optimized system performance, reducing latency by 40% through advanced caching and real-time data processing.

Lead Computer Scientist

Zippia

February 2016 - March 2018, San Francisco, CA (Remote)

- Developed scalable backend using MongoDB, Elasticsearch, Redis, Node.js, Express.js, NestJS etc. for enhanced modularity.
- Architected over 10 microservices, improving system scalability and reducing deployment times by 30%.
- Built a personalized email notification system, increasing user engagement by 25% through tailored content.

Lead Software Engineer

Armor5 (Acquired by Digital Guardian)

March 2015 - February 2016, New Delhi

- Reverse Proxy Engine: Designed client-server architecture, reducing server response times by 25%.
- Virtual Browser: Implemented DOM mirroring and caching solutions for CSS/JS/HTML.
- Earned the Armor5 You Rock award for optimizing reverse proxy performance by 25%.

Software Engineer - 2

Adobe

October 2012 - February 2015, Bangalore, KA

- Adobe Dhvani: Patented content sync algorithm (Patent # US9392144B2), leading Android app development.
- Adobe Licensing Management: Led subscription mode development.
- Awarded Adobe Special Contribution Award for Adobe Dhvani and Adobe Bravo for handling MAX 2013.

Software Engineer

Newgen Software

January 2011 - October 2012, New Delhi

- Developed layout engine in C#.NET for PDF generation that improved document handling efficiency by 30%.
- Optimized data parsing mechanism resulting in a 40% reduction in file read ops and decreasing average data retrieval time.
- Awarded Newgen Star Performer Award for contributions to layout engine.

EDUCATION

Bachelor Of Technology

Minor in Computer Science • The Technological Institute of Textile and Sciences • Bhiwani, Haryana • 2011 • 8.95

- Awarded full scholarship for four years due to academic performance
- Research Paper: Published a research paper on the enhanced JPEG steganography (1793-8163, vol 2 No 5 Oct 2010)
- Presented two research papers on information security in national conferences, year 2010

SKILLS

Technical Skills

Backend & Data Science

Node.js, Python, Express.js, MongoDB, MySQL, Elasticsearch, Redis, Kafka, Celery, Redis, Pandas

Familiar With - k8s, GCP, AWS, Bash scripting for DevOps work

Professional Attributes

Leadership, Team Management, Communication, Problem-solving, Innovation
